

LA-TWEEZ COSMOPOLITAN TOP 5

It's date night: your outfit looks hot, legs waxed, make-up perfect, hair beautiful ... oh no, your eyebrows! Straggly, furry brows can ruin a gorgeous look. So, how does a chick keep her brows in check? Revolutionary La-Tweez stainless steel tweezers come in a lipstick-style compact (fuchsia or black) with built-in mirror and spotlight, which highlights the entire area as you pluck RRP \$19.95. Ingenious idea! Check out www.latweez.com.au for more info.

Available from pharmacies nationwide.

3. EYEBROW DOS

DO get stragglers DO use a light so you can see the tiniest of hairs DO shade stray hairs with a white pencil before plucking DO only ever pluck hairs in the direction they grow DO check the brow shape so you don't overpluck!

1. CREATING A BEAUTIFUL LOOK

Give your face a makeover and get thee to a brow specialist. Eyebrows are an important facial feature as they frame and enhance your eyes. Impeccably arched brows will make you look even more beautiful. Visit a pro to create your perfect shape, then you can maintain it!

2. PERFECT THE PLUCK

Hold a pencil alongside your nose; your brow should start in line with the pencil's edge. Then angle the pencil from the base of nose to outer corner of eye – finish here. The peak of the arch should be above the iris.

4. EYEBROW DON'TS

DON'T over-tweeze above the brow as this can distort shape
DON'T over-tweeze into the shape as the hairs might not grow back
DON'T use eyeliner to fill in brows because the intense colour is way too harsh, lady.

5. KEEPING AN EYE ON IT

TOP TIP always pluck your brows back to their original shape. No extra plucks here and there, otherwise you'll be browless in no time and that ain't a pretty look.
